LIST OF ABNORMALITIES

CORTRIUM ANALYSIS SYSTEM

Cortrium Analysis System identifies and presents
suggested examples of the following arrhythmias and beats.

1. Three classes of heartbeats:

Normal beats
Ventricular beats
Supraventricular beats

2. Rhythms:

Sinus Rhythm

Normal sinus rhythm
Sinus bradycardia
Sinus tachycardia

Ventricular Rhythm

Ventricular couplets
Ventricular runs
Ventricular tachycardia
Ventricular bigeminy
Ventricular trigeminy
Idioventricular rhythm
Ventricular fibrilation/ventricular flutter[1]

Supraventricular Rhythm

Supraventricular couplets
Supraventricular runs
Supraventricular tachycardia
Supraventricular bigeminy
Supraventricular trigeminy
Atrial fibrillation/atrial flutter[2]

3. Other:

Asystolic pauses > 2 seconds
AV block

[1] Presented as ventricular fibrillation

[2] Presented as atrial fibrillation
